 WATER-RESISTANT	 SCREWED BACK
 WATER-RESISTANT	 DIAMOND

Water-resistance

Balmain watches are approved under the criteria applied for the international ISO 22810 norm. Given that the constraints of actually wearing a watch cannot all be simulated in a laboratory.

A range methods are used to check the water-resistance of watches depending on the level of protection required. Although the use of sealing gaskets confers a certain degree of imperviousness, it is how the watch is constructed that is instrumental in determining its ability to keep water and dust out. There are a number of parts in particular that play a crucial role in ensuring a watch's water-resistance: the case back and the crown, the glass and in principle all the element that make up the case.

In general, water-resistance cannot be guaranteed for an unlimited time. It may be affected by the natural wear of the gaskets or by an accidental shock which may deform the moving parts of the case. For reasons of safety, we recommend that you have your watch checked for water-resistance regularly a year by an approved Balmain agent.

1. Marking on back of the watch

THE STORY OF BALMAIN COUTURE

Pierre Balmain, born in 1914, firmly believed that dressmaking was the architecture of movement. This distinctive, inextricable combination had its foundations in the French designer's early years. He spent these cocooned in France's Savoy region among bolts of silk in his parents' fabric store and majestic mountains. His mother dreamed of her son becoming an architect. His dream was to become a fashion designer. Fashion design finally won; architecture lived on in his approach and process.

A beautiful phoenix

Pierre Balmain opened his fashion house in Paris in 1945, against a backdrop of post-war economic hardship and material shortages. His core talent lay in the ability to create simple, tailored suits and grand evening gowns that shared the aesthetic of slender, graceful lines. The precision of the trained architect's eye quickly attracted Parisian women. They adored the associated image of the active, elegant female with a slightly rebellious twist. The Balmain woman supported fashion's departure from wartime severity, relishing the return of opulent dresses and sumptuously embroidered suits. The house's popularity went from strength to strength and by 1956 the Paris workshops employed 600 people.

Tailoring success

During the 1960s Pierre Balmain's sophisticated outfits, sometimes with daring touches, attracted much attention, including that of a number of international stars like Marlene Dietrich, Michèle Morgan, Katharine Hepburn, Brigitte Bardot, Sophia Loren and Dalida. Even a royal seal of approval came as her Majesty Queen Sirikit of Thailand chose Balmain as her designer and the Queens of Denmark and Belgium ordered complete wardrobes from the Paris fashion house. Airline uniforms and official attire for the 1968 Summer Olympic Games held in Mexico joined the impressive portfolio. During the 1970s the house of Balmain flourished and a ready-to-wear collection was a big success. The death of Pierre Balmain in 1982 paid its toll on the brand, but in the 1990s approval of such stars as Jacky Onassis and Liza Minnelli created a promising springboard for the French brand's entry into the new millennium.

Muse of modernity

By 2006 the Balmain brand was back in the spotlight with the understated cuts, rock style, graphic impact and sensuousness that were part of its DNA. The success of this path got 21st century endorsement from the international fashion press, as well as star fans such as Marion Cotillard, Gwyneth Paltrow, Audrey Tautou and Kate Moss. Glamour with an undercurrent of edgy rebellion lived on. Passion continues to drive the Balmain fashion brand. Its clothes are still sought-after by big names of stage and screen, as well as stylish individuals who love their looks to move with the times and stay true to strong foundations.

THE STORY OF BALMAIN WATCHES

For Swiss entrepreneur Nicolas G. Hayek, time's movement also had an intrinsic architecture of beauty and precision. In the 1980s the designs of Pierre Balmain caught the expert eye of the founder of the Swatch Group S.A. and in 1987 the company obtained an exclusive license to produce Pierre Balmain watches in Switzerland. The first collections were a huge success, so in 1995 the Group became the owner of the Pierre Balmain watch brand for production in Switzerland and international distribution.

Blueprints for beauty

Balmain watches are built on an encounter of excellence. Swiss watchmaking expertise and innovation have led to collections that accurately reflect the refinement and draw of haute couture. Bold, attractive shapes form the timepieces' signatures. These are the canvases for contemporary technology and materials that surprise and seduce. The watch brand's history includes a string of firsts and head-turning executions. The 1990s saw Balmain's unprecedented use of diamond settings in steel watch cases. In 1998 the Chronolady showcased the world's smallest chronograph for a ladies' timepiece. Madrigal Mirror revealed a real mirror in 2000.

Tailor-made style

Meticulous attention to detail is one of the many bonds between the worlds of Balmain fashion and its watches. Decoration with arabesques is a characteristic accent of the timepieces' designs. This is inspired by the ornate embroidery featured on Pierre Balmain's haute couture dresses and also takes some new directions in modern interpretations. Elegance and prestige are the languages spoken by the contemporary Balmain watch collections. Style grows from many sources and each model has its own story to tell, while inviting its wearers to tell theirs.

A tradition of quality

Balmain watches, with their prestigious Swiss Made label, are created in Saint-Imier, at the heart of the Jura region, the cradle of traditional watchmaking. Whether they are made of stainless steel, coated with yellow or pink PVD, or adorned with diamonds, all the Balmain timepieces meet the same stringent quality criteria. Each detail is crafted to perfection, fit for the celebrity red carpet or the city sidewalk, complementing today's dynamic male and female lifestyles. The brand also has a comprehensive after-sales service operating all over the world. Balmain watches are committed to carrying the tradition of tailor-made time into the future.
